Remote Control Smart Remote

Information copy

"Full control" via remote control. In connection with the corresponding app, the remote control Smart Remote becomes the universal remote control. The Smart Remote replaces remote controls RC1 to RC10.

Details

The never-ending search for the right remote control is over! With Smart Remote, you control all STEINEL sensors and sensor-switched lights very conveniently with just one device. If you also download the corresponding app to your smartphone or tablet and connect it via Bluetooth with the remote control Smart Remote, you can control all STEINEL products centrally via infrared. It doesn't get any smarter than that!
