## Functional description

The more obscure building corners, the more winding corridors and passageways, the more corner specialist IS 2300 ECO has what it takes. The 3 pyro sensors work together to give it a coverage angle of no less than 300°. So this little gem can even look round corners, quite literally. It's also a powerful performer in terms of switching capacity. At 2,000 watts, you can reliably automate lighting systems made up of several luminaires all
